

Q. Write a program to print table of n number using while loop.

➤ **Code:**

```
#include<stdio.h>
#include<conio.h>
main(){
    clrscr();
    int o,n,m=1;
    printf("Enter A Number To Print Table:");
    scanf("%d",&n);
    while(m<=10){
        o=m*n;
        printf("%d * %d = %d",n,m,o);
        m++;
    }
    getch();
}
```

➤ **Output:**

Enter A Number To Print Table:2

$$2 * 1 = 2$$

$$2 * 2 = 2$$

$$2 * 3 = 2$$

$$2 * 4 = 2$$

$$2 * 5 = 2$$

$$2 * 6 = 2$$

$$2 * 7 = 2$$

$$2 * 8 = 2$$

$$2 * 9 = 18$$

$$2 * 10 = 20$$
